Common Syllabus revised 8/22/2018

This syllabus contains information common to all sections of IT 357 for the Fall 2018 semester. Information specific to each section will be made available to registered students via the Blackboard course management system.

University Policies

The University Catalog is the central resource for university policies affecting student, faculty, and staff conduct in university affairs. Unless explicitly noted, any conflict between the policies in the University Catalog and the content of this document is unintentional. Please notify the author to resolve any such conflicts.

Please note that the Academic Year runs from the Fall semester of one calendar year through the Spring and Summer semesters of the following calendar year. Please be sure to select the correct archived Catalog if appropriate.

Scheduled Sections

<table>

</table>

Access to Blackboard for each section will be made available no later than the day of the first class.
Course Description

From the University Catalog:

**IT 357: Network Security I.** 3 credits.

Covers computer crime, relevant laws, agencies, and standards. Presents auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Students get hands-on experience with forensics tools. Notes: For INFT and AIT majors, minors and certificates, and BAS cybersecurity concentration only. Offered by Info Sciences & Technology. Limited to two attempts. Equivalent to CRIM 304.

Registration Restrictions:

**Required Prerequisites:** (IT 103X, 103C, 103T, 104C or 104T) and IT 223B.

- C Requires minimum grade of C.
- B Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Applied Information Technology, Applied Science, Individualized Study, Information Technology or Infmtn Tchngy Entrepreneurship.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

Prerequisites

The required grades must be achieved in each prerequisite course before a student is qualified to take this course. The prerequisite courses must be completed prior to, not concurrently with, this course.

This requirement will be strictly enforced. Any student enrolled in the course who has not met the prerequisite requirements (or received a waiver) by the start of the semester will be dropped from the course and the student will be responsible for any consequences of being dropped.
Rationale

This course is intended to help prepare students for careers in homeland defense, law enforcement, or commercial IT security, and for graduate work in security, information systems, or law.

Students will learn the principles of computer investigations and digital evidence. They will learn about jurisdiction, chain of evidence, and legal authority. Social, legal, and ethical implications will be carefully considered. Hands on exercises will give students experience imaging disks, recovering system files, and analyzing logs on both Windows and Linux platforms.

Course Applicability

IT 357 is an option in the Information Security (INFS) concentration of the Bachelor of Science in Information Technology, and a Technical Focus Course in the Information Technology Minor and the Information Technology Undergraduate Certificate.

IT 357 is an elective in the Bachelor of Arts in Criminology, Law and Society, and in the Criminology, Law and Society Minor.

Objectives

On successful completion of this course, students will:

- Understand the legal and technical aspects of computer forensics.
- Understand applicable laws, and the roles of legal authorities.
- Understand how to obtain and handle digital evidence, and will have been exposed to a range of freeware forensic tools.
Faculty and Staff

Course Coordinator:
    Prof. Lyons

Instructors:
    See Scheduled Sections above.
    See links to faculty home pages for information on office hours, contact preferences, etc.

Teaching Assistants:
    To be assigned – see Blackboard

Administrative support:
    Department of Information Sciences and Technology
    Fairfax campus
    5400 Nguyen Engineering Building
    Email: bsit@gmu.edu
    Phone: 703-993-3565

</tr>
</tbody>
</table>
There is one *recommended* textbook for this course:

![Cyber Crime Fighters: Tales from the Trenches](image)

**Cyber Crime Fighters: Tales from the Trenches**  
Felicia Donovan and Kristyn Bernier  
ISBN-10: 0-7897-3922-4  
© 2009; Que Publishing

See the publisher’s Web page for rental and purchase options.

---

**Grading**

Grades will be awarded in accordance with the Mason Grading System for undergraduate students. See [AP.3.1 Undergraduate Grading](#) for more information.

The grading scale for this course is:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>97 – 100%</td>
<td>Passing</td>
</tr>
<tr>
<td>A</td>
<td>93 – 96%</td>
<td>Passing</td>
</tr>
<tr>
<td>A−</td>
<td>90 – 92%</td>
<td>Passing</td>
</tr>
<tr>
<td>B+</td>
<td>87 – 89%</td>
<td>Passing</td>
</tr>
<tr>
<td>B</td>
<td>83 – 86%</td>
<td>Passing</td>
</tr>
<tr>
<td>B−</td>
<td>80 – 82%</td>
<td>Passing</td>
</tr>
<tr>
<td>C+</td>
<td>77 – 79%</td>
<td>Passing</td>
</tr>
<tr>
<td>C</td>
<td>73 – 76%</td>
<td>Passing</td>
</tr>
<tr>
<td>C−</td>
<td>70 – 72%</td>
<td>Passing*</td>
</tr>
<tr>
<td>D</td>
<td>67 – 69%</td>
<td>Passing*</td>
</tr>
<tr>
<td>F</td>
<td>60 – 59%</td>
<td>Failing</td>
</tr>
</tbody>
</table>

* Grades of "C−" and "D" are considered passing grades for undergraduate courses, but those grades may not be applicable as prerequisite grades or towards graduation, depending on the program and the Catalog Year. See the [University Catalog](#) for more information.

Raw scores may be adjusted by the Instructor to calculate final grades.
Final grades will be determined based on the following components:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Classwork, Activities, Labs</td>
<td>15%</td>
</tr>
<tr>
<td>Case Study Report</td>
<td>10%</td>
</tr>
<tr>
<td>Quizzes/Blogs</td>
<td>10%</td>
</tr>
<tr>
<td>Project</td>
<td>25%</td>
</tr>
<tr>
<td>Mid-term exam</td>
<td>20%</td>
</tr>
<tr>
<td>Final exam</td>
<td>20%</td>
</tr>
</tbody>
</table>

These components are outlined in the following sections.

Classwork

For classroom sections: Labs and other exercises will be assigned in class. Class sessions will include time in a computer lab classroom. Students are expected to attend every class session and work on labs during class time; some labs may require additional time outside of the class session. Any student who misses an in class assignment due to an unexcused absence will receive zero (0) for that assignment.

For online sections: Equivalent or alternate work will be assigned during online sessions.

Case Study Reports

Each student is required to research a case study related to course content, as directed by the Instructor. The student will write a summary and analysis, and submit the report as directed.

Quizzes/Blogs

For classroom sections: Quizzes will be given in selected classes throughout the semester, and will not be announced in advance. Any student who misses a quiz due to an unexcused absence will receive zero (0) for that quiz. Blog topics may be posted on Blackboard in response to lectures or current events. Each student is required to respond to the topic on the discussion board within one week of its posting or by the specified due date.

For online sections: Equivalent or alternate work will be assigned during online sessions.

Project

The Instructor will assign a project that will involve both group and individual activities. Each student individually will prepare and submit a project in accordance with requirements to be discussed in class or online sessions.
Mid-term exam

For classroom sections: The mid-term exam will be conducted during the 6th scheduled class session.

For online sections: Students are required to attend an exam session (to be scheduled and announced in Blackboard) in person, or to arrange for a proctored exam.

The mid-term exam will be based on topics addressed in Lectures 1-5, and will be “closed book” - no reference materials other than those provided with the exam paper will be permitted. Mid-term exams will be returned to students.

Final exam

For classroom sections: The final exam will be held during the scheduled final exam session (see Fall 2018 Final Exams).

For online sections: Students are required to attend an exam session (to be scheduled and announced in Blackboard) in person, or to arrange for a proctored exam.

The final exam will be based on topics addressed throughout the entire course and will be “closed book” - no reference materials other than those provided with the exam paper will be permitted. Final exams will be retained by the Department of Information Sciences and Technology and will not be returned to students.

There are no opportunities for individual "extra credit" in this course. All students will be given the same opportunities to complete assigned work.

Please note that exams may be re-scheduled to compensate for disruptions in the semester schedule and students are required to be available throughout the exam period including the scheduled Make-up Day.

Students are expected to submit work as scheduled by the Instructor. Any assignment submitted after the due date-time but within 24 hours of it will be graded with a penalty of 25% of the available credit. Any assignment submitted more than 24 hours late will not be graded. Exceptions to the submission time requirement may be made at the sole discretion of the Instructor.

Any student with an unexcused absence (including absence from part of a classroom session due to late arrival or early departure) will receive no credit for any assessment activity missed during that absence. A student arriving after an assessment activity has begun will not receive additional time to complete the activity, unless the late arrival is excused by the Instructor.

A student with an exam conflict (or other circumstance that would justify rescheduling an exam under Mason policy), must notify the Instructor no later than 2 weeks prior to the scheduled exam. A student in an online section who wishes to take a proctored exam at another location must notify the Instructor no later than 3 weeks prior to the scheduled exam and the student will be responsible for making appropriate arrangements in accordance with Mason Policy 3004.

Any student arriving more than 15 minutes late for an exam may be prohibited from taking the exam at the sole discretion of the Instructor.
Each student is required to present a current Mason ID in order to take an exam or other in-person assessment. No other form of identification is accepted. See the Your Mason ID Web page for information on obtaining a Mason ID.

Mid-term and final grades will be posted to PatriotWeb, which is the only mechanism for students to obtain those grades. A student with a "hold" on his/her PatriotWeb account will be unable to access grades until the hold has been removed by the Registrar.
## Schedule

<table>
<thead>
<tr>
<th>Lecture</th>
<th>Content</th>
</tr>
</thead>
</table>
| 1       | Introduction to course/syllabus/policies  
          | Introduction to Computer Forensics |
| 2       | Crime and Law – part 1 |
| 3       | Crime and Law – part 2 |
| 4       | Hardware forensics  
          | Review for midterm exam |
| 5       | **Mid-term exam**  
          | Class work |
| 6       | Field Trip Activity |
| 7       | Report Writing |
| 8       | Crime Scene Activity |
| 9       | Software/Windows Forensics – part 1 |
| 10      | Software/Windows Forensics – part 2 |
| 11      | Individual project lab time |
| 12      | Linux, Unix, Mac file systems and forensics  
          | Cell phone forensics; Password cracking |
| 13      | Network forensics, Logging and auditing |
| 14      | Review for final exam |
| –       | **Final exam** |

*This schedule is subject to revision before and throughout the course.  
Registered students should see Blackboard for the latest class schedule.*

If a class is cancelled due to closure of a University campus or similar circumstance:

- The Provost may schedule a Make-Up Day, in which case the cancelled class will be held on that day, at the usual class time and in the usual classroom unless otherwise advised. Please note that the Make-Up Day may be on a different day of the week from the usual class day.

- If the Provost does not schedule a Make-Up Day the Instructor will schedule an *ad hoc* make-up session. The make-up session may be online – students will need Internet access and a compatible browser in order to participate in real time, and/or to view a recording of the session.
Important Dates

Please see the Fall 2018 Calendar for important dates, including the last days to add and drop courses.

Religious Holidays

A list of religious holidays is published by University Life. Any student whose religious observance will conflict with a scheduled course activity must notify the Instructor by the end of the second week of the semester in order to make alternative arrangements.

Attendance Policy

Students are expected to attend every class, to complete any required preparatory work (including assigned reading – see Schedule above) and to participate actively in lectures, discussions and exercises. As members of the academic community, all students are expected to contribute regardless of their proficiency with the subject matter.

Students are expected to make prior arrangements with Instructor if they know in advance that they will miss any class and to consult with the Instructor as soon as possible if they miss any class without prior notice. Any student who expects to miss more than one class session is strongly advised to drop the course and take it in a later semester when he/she can attend every class.

Mason policy AP.3.10 requires students to take exams at the scheduled time and place, unless prior approval is granted by the student's academic dean or director. An unexcused absence from an exam will result in a score of zero (0) for that exam. Please note that exams may be re-scheduled by the Registrar to compensate for disruptions in the semester schedule and students are required to be available throughout the exam period including the scheduled Make-up Day.

Classroom conduct

Students are expected to conduct themselves in a manner that is conducive to learning, as directed by the Instructor. Any student who negatively impacts the opportunity for other students to learn may be asked to leave the classroom.

Electronic devices are potential distractions in the classroom environment. All electronic devices must be turned off or set to "silent" mode at all times unless the Instructor directs otherwise. In order to maximize student engagement the Instructor may prohibit use of such devices.

Unless explicitly approved in advance by the Instructor, photography, audio recording, and video recording are not permitted in the classroom.

Communications

Registered students will be given access to a Blackboard section for this course. Blackboard will used as the primary mechanism (outside of lectures) to disseminate course information, including announcements, lecture slides, homework and other assignments, and scores for homework and exams. Some announcements may be sent via Blackboard to students' Mason email accounts.
Communication with the Instructor on issues relating to the individual student only should be conducted using Mason email, via telephone, or in person - not in the public "Discussions" forums on Blackboard. To protect student privacy any communication related in any way to a student's status must be conducted using secure Mason systems – if you use email to communicate with the Instructor you MUST send messages from your Mason email account. Students must activate and monitor their Mason email accounts to receive important information from the University, including messages related to this class. Students are advised to use Blackboard, Tools, Send Email, Select Users to originate email messages to an Instructor.

Lecture slides are complements to the lecture process, not substitutes for it - access to lecture slides will be provided in Blackboard as a courtesy to students provided acceptable attendance is maintained.

All course materials (lecture slides, assignment specifications, etc) are published on Blackboard in Adobe® Portable Document Format (PDF). This allows users of most computing platforms to view and print these files. Microsoft® Word (or a compatible word processing application) is required for preparing assignments – it is available on computers in the Mason open labs.

Online sections will use several tools through Blackboard. Students are responsible for obtaining Internet access and a compatible platform. Appropriate computers are available on campus in open labs.

Privacy

Instructors respect and protect the privacy of information related to individual students. For information on student rights and privacy under the Family Educational Rights and Privacy Act of 1974 (FERPA) please see FERPA at Mason.

As described above, issues relating to an individual student will be discussed via email, telephone or in person. Instructors will not disclose protected information identifiable to an individual student with other students (or anyone without a need to know) without prior permission of the student.

Homework, quizzes, mid-term exams and other assessable work will be returned to each individual student directly by the Instructor (or by a faculty member, staff member, or Teaching Assistant designated by the Instructor, or via another secure method). Under no circumstances will a student's graded work be returned to another student.

Instructors, Teaching Assistants, and staff will take care to protect the privacy of each student's scores and grades.
Disability Accommodations

Disability Services works with disabled students to arrange for appropriate accommodations to ensure equal access to university services. Any student with a disability of any kind is strongly encouraged to register with Disability Services as soon as possible and take advantage of the services offered.

Accommodations for disabled students must be made in advance – Disability Services cannot assist students retroactively. Any student who needs accommodation should contact the Instructor no later than the first class.

If a student has an accommodation that allows the student to take an exam in the Disability Services Testing Center, the Instructor will determine the date and time of that exam – the student must not contact Disability Services to schedule the exam until the Instructor has advised the date and time.

Campus Notifications

Students are encouraged to subscribe to the Mason Alert system to receive notifications of campus emergencies, closings, and other situations that could affect class activities.

Each classroom has a poster explaining actions to be taken in different types of crisis. Further information on emergency procedures is available at the Emergency Management Web site. In the event of a possible emergency, students are encouraged to dial 911.

Other Resources

Mason provides many useful resources for students – see Students - George Mason University. The following resources may be particularly useful:

- The Writing Center
- The Academic Advising Center
- The University Libraries
- Counseling and Psychological Services
- University Career Services

Students in online sections may benefit from these resources:

- Online Learning Resources
- University Libraries - Mason Online

Academic Integrity

All members of the Mason community are expected to uphold the principles of scholarly ethics.

The IT major has been designed to achieve several specific outcomes. One of those outcomes is: “An understanding of professional, ethical, legal, security, and social issues and responsibilities.”
Graduating students are bound by the ethical requirements of the professional communities they join. The ethics requirements for some of the communities relevant to IT graduates are available via the following links:

- ACM Code of Ethics and Professional Conduct
- IEEE Code of Ethics
- EC-Council Code of Ethics

On admission to Mason, students agree to comply with the requirements of the Mason Honor Code and System. The Honor Code will be strictly enforced in this course. Honor Code cases are heard by a panel of students – students who meet the requirements are encouraged to nominate themselves to serve on the Honor Committee.

Any use of the words or ideas of another person(s), without explicit attribution that clearly identifies the material used and its source in an appropriate manner, is plagiarism and will not be tolerated. The Instructor reserves the right to use manual and/or automated means (including such services as SafeAssign) to detect plagiarism in any work submitted by students for this course, and to direct Teaching Assistants and/or other faculty and/or staff members to do likewise in support of this course.

For this course, the following requirements are specified:

- All assessable work is to be prepared by the individual student, unless the Instructor explicitly directs otherwise.

- All work must be newly created by the individual student for this course for this semester. Any usage of work developed for another course, or for this course in a prior semester, is strictly prohibited without prior approval from the Instructor.

Students may seek assistance with assigned work (and are encouraged to do so if they feel the need), provided:

- The directions for the assigned work do not prohibit such assistance.

- Such assistance is explicitly acknowledged in the submitted work, clearly identifying the person(s) giving assistance and the nature of the assistance given.

- Any individual work to be submitted is prepared entirely and exclusively by the student submitting it. Students are expressly prohibited from sharing any individual assessable work for this course in any manner with other students (except students assigned as Teaching Assistants or Undergraduate Peer Mentors to this course and the student's section), unless all students involved have had their work graded and returned by the Instructor, or the Instructor has explicitly approved such sharing.

Another aspect of academic integrity is the free exchange of ideas. Vigorous discussion and debate are encouraged in this course, with the firm expectation that all aspects of the class will be conducted with civility and respect for differing ideas, perspectives, and traditions. When using online tools to communicate, students are expected to follow the conventions of Netiquette. Mason values diversity: through the Office of Diversity, Inclusion, and Multicultural Education (ODIME), Mason seeks to create and sustain inclusive learning environments where all are welcomed, valued, and supported.
Students are encouraged to ask for clarification of any issues related to academic integrity and to seek guidance from the Instructor, other faculty members, academic advisors, or the Office for Academic Integrity.
